## Cinnamon Topiary Materials List

Amazing GOOP® Craft Adhesive  
Florasense® cinnamon Spice™  
Botanical Potpourri  
3/8" Burnt Red Ribbon  
4" Ball Grapevine  
3.6" Mini Standard Terra Cotta Pot  
FloraCraft® Dry Foam  
2-5/8"x3-3/4" mugplug  
1' 5/16" Wood dowel

**Other Supplies:**  
Wax Paper (work area)  
Scissors  
Pencil  
Ruler

## Cinnamon Spice Potpourri Topiary

Designed by Michele May for Eclectic Products, Inc.

Items for the Cinnamon Spice Potpourri Topiary

#1 Dowel

#2 Ribbon

#3 Potpourri

#4 Mugplug & Pot

#5 Mugplug & Dowel

#6 Pot Ribbon

Completed Topiary

### Directions

Note: Read these directions and the instructions on the opposite side completely before beginning this project. Always work on a level and protected surface. Wax paper works great to protect work area. Use photos as a guide.

- #1 Cut 5/16" wood dowel to 1'. Push dowel through center of grapevine ball until it hits the opposite end but doesn't go through the opposite end. Make sure the ball is centered on the dowel. Apply GOOP to both ends where the dowel meets the ball. Hold in place approximately 30 seconds. Allow to dry approximately 2 hours before proceeding.
- #2 To top of dowel at base of ball, apply a small dab of GOOP. Press end of ribbon to GOOP and hold for approximately 30 seconds. While holding end do ribbon in place, wrap remaining ribbon tightly around dowel, covering completely and stopping proximately 3" from bottom. Cut excess ribbon. Apply a small dab of GOOP and press end of ribbon firmly to GOOP for approximately 30 seconds.
- #3 Working one section at a time, adhere potpourri to grapevine ball until ball is completely covered. Allow to dry approximately 2 hours before proceeding.
- #4 Press mug plug firmly into bottom of pot. Mark and cut mug plug to just below top of pot. With mug plug firmly snug in bottom of pot, apply GOOP around edge, between mug plug and pot, to secure.
- #5 Center and push dowel and ball down center of mug plug until dowel hits bottom of pot, then pull out. Fill hole with GOOP. Push dowel back into hole and apply GOOP around base of dowel. Adhere potpourri to top of mug plug until completely covered.
- #6 Apply a small dab of GOOP on backside of pot rim. Tie ribbon tightly around pot rim and finish with bow in front. Apply a small dab of GOOP under bow and press firmly in place for approximately 30 seconds.
- #7 Project complete and ready to use in approximately 24 to 72 hours.

## INSTRUCTIONS

1. Surface should be clean, dry and free of dirt. For best results, roughen surface before use. Use GOOP in a well-ventilated area.
2. Puncture the seal in the neck of the tube using the pointer cap. Product can be used between 50°F (10°C) and 90°F (32°C). Dry time decreases when used between 70°F (21°C) and 90°F (32°C).
3. Always test a small area to ensure proper application techniques and dry time.
4. Apply GOOP directly to each surface to be bonded or repaired. Allow GOOP to partially cure, 2-10 minutes before bringing surfaces together.
5. Allow the repair to dry for 24 hours. Depending on the materials and temperature, maximum strength may not be reached for 48 to 72 hours.
6. To ensure easy cap removal, apply a thin coat of petroleum jelly to the threads of the tube before replacing the cap.
7. Clean uncured adhesive with acetone or naphtha, the adhesive will ball up and brush off. Cured material may be removed by cutting or scraping.
8. For further information, call (800) 767-4667.

**Note:** GOOP may damage finished surfaces. Avoid such contact until GOOP is completely dry. GOOP is not recommended for any items that come into contact with food, drinking water or animals. Do NOT dry-clean GOOP because dry cleaning solvent breaks down the cured adhesive. GOOP is not recommended for use on polystyrene, polyethylene or polypropylene plastics. Do not use GOOP for bonding Styrofoam™ or paper products.

## COMMONLY ASKED QUESTIONS

### **What temperature range does GOOP withstand?**

GOOP can be applied in temperatures ranging from 50°F to 90°F. When cured, GOOP can withstand temperatures between -40°F and 150°F.

### **How can uncured GOOP be cleaned up?**

Small amounts of acetone or citrus-based solvents may be used. GOOP will ball up and brush off.

### **How can cured GOOP be removed?**

Cured GOOP may be removed by cutting or scraping.

### **How long does GOOP take to dry?**

A full cure takes 24 to 72 hours, depending on the surrounding environment. Cure time increases with lower temperatures and decreases with high temperatures.

### **How can dry time be decreased?**

To speed drying time, apply heat using a hand-held hair dryer. Set dryer on low and do not hold directly on GOOP.

### **Can GOOP be dry-cleaned?**

No. Dry-cleaning solvent breaks down GOOP. GOOP is washer/dryer safe.

### **Can GOOP be used on Styrofoam™ ?**

No. GOOP is not recommended for use on any *polystyrene*, *polyethylene* or *polypropylene* plastics.

### **What materials will GOOP adhere to?**

GOOP works on virtually any material, including glass, plastic, metal, leather, vinyl, rubber, neoprene, poly carbonate, brick, marble, ABS, PVC, copper, waterproof cloth, aluminum, brass, wood, linoleum, fiberglass, Naugahyde™, porcelain and ceramic.

**CAUTION - Flammable, Vapor Harmful:** Contains toluene and petroleum distillate. May cause dizziness, headache or nausea. Causes eye, skin, nose and throat irritation. Intentional misuse by deliberately concentrating and inhaling the contents may be harmful.

**WARNING:** This product contains a chemical known to the state of California to birth defects or other reproductive harm.

Keep away from heat and flame. Extinguish all sources of ignition during and until all vapors are gone. Prevent build-up of vapors by opening all window and doors to achieve cross ventilation.

**Use only with adequate ventilation.** To avoid breathing vapor, open all windows and doors to assure fresh air movement during application and drying. Close container after use. Avoid contact with eyes and skin. Wash thoroughly after handling.

**FIRST AID:** If you experience difficulty in breathing, leave the area to obtain fresh air. If continued difficulty is experienced, get medical assistance immediately. In case of eye contact, flush immediately with plenty of water and get medical attention; for skin wash thoroughly with soap and water. If swallowed, do not induce vomiting, get medical attention.

### **KEEP OUT OF THE REACH OF CHILDREN.**

**LIMITED WARRANTY:** The manufacturer will not accept liability for more than product replacement.
