FOR REPAIR OF WOOD DEFECTS

Wood-[®]Tex[®]

SYNTHETIC WOOD

- Waterproof
- Fast Setting
- Minimum Shrinkage
- Stains Like Real Wood

Originally developed for the plywood and furniture industries, Wood-[®]Tex[®] Synthetic Wood meets some very rigid standards. In fact, Wood-[®]Tex[®] has been TESTED AND APPROVED BY THE AMERICAN PLYWOOD ASSOCIATION.

Today, Wood-[®]Tex[®] Synthetic Wood is available to consumers nationwide in a variety of container sizes including pints, quarts, gallons, five gallons and 55 gallon drums.

Nothing Patches Like the Real Thing.

Genuine wood flour combined with special bonding agents makes Wood-[®]Tex[®] Synthetic Wood *handle* like wood itself. Stain it, sand it, drill it, plane it - just like real wood.

Nothing Matches Like the Real Thing.

Available in 6 standard colors, Wood-[®]Tex[®] accepts stains like real wood, to match any wood species. With volume orders, custom color matching is possible.

Because it dries fast (7 - 15 minutes) with minimal shrinkage, Wood-[®]Tex[®] Synthetic Wood *looks* like the wood it's replacing.

To eliminate waste and restore Wood-[®]Tex[®] Synthetic Wood to its original consistency, add a small amount of Wood Filler Solvent.
